Re: Notice of Intention to Commence
Small Mining Operations L.C. and
K.C.L. Claims (Mine and Mill)
Project, Iron County, Utah

Dear Mr. Whited:

In a letter dated September 4, 1991 from the Division of Oil, Gas and Mining, you were advised to contact the Department of Environmental Quality so that a determination could be made in regards to additional permits and/or approvals that may be required prior to starting mining operations. As of this date this office has not been contacted, or received any information that would assist us in evaluating your operation for environmental permits.

Please be advised that operating a mining and ore processing operation without the proper environmental permits could result in enforcement action by this office, and request that this office be contacted as soon as possible to discuss the need for permits, and the permitting process.

Should you have any questions, please contact office or the Division of Water Quality at 538-6146.

Sincerely,

Wayne S. Thomas
